

4th World congress

of coloproctology and pelvic diseases
INNOVATION AND CURRENT DEBATES

Chairman: Antonio Longo

Co-Chairman: Giuseppe Spinoglio, Angelo Stuto

Rome
June 19-21, 2011

Ergife Palace Hotel, Rome

When you organize an International Meeting, the workload is so heavy that you swear you will never do it again.

But once you recover from the fatigue, you ask yourself whether you did a good job, whether the conference you organized was useful for the training and professional enrichment of the participants.

If you feel your Congress was useful, your enthusiasm is boosted and you are ready to repeat the experience.

And so we have decided to go for the **4th edition of this two-year appointment in Rome.**

For the past edition we take the credit of having chosen the right people!

And I take this opportunity to thank once again all the members of the

Faculty, not only because they honoured us with their presence (indeed nobody ever turned down our invitation), but above all for their great scientific and human contribution. They gave a perfect interpretation of the consolidated and successful formula of a Congress that attaches priority to the discussion of the most controversial issues in coloproctology.

Besides including a discussion on the most widespread malignant and benign colorectal disorders, that cannot be overlooked, this edition will provide a thorough discussion in particular of pelvic functional pathologies, with primary or secondary involvement of the rectum. Even though this is a pelvic organ, it does not receive appropriate attention by all those who deal with pelviperineology. This state of affairs is not attributable to the urogynecologists but is due to an unexplainable lack of interest by coloproctologists.

After having used such symbols as the Colosseum, the Mouth of Truth, the Lupa Capitolina for the previous conferences, this time we have chosen the Roman Emperor-Philosopher, Marcus Aurelius (Rome 121 – Vienna 180 AD).

A controversial historic figure whose actions were always imbued with the pragmatism of war strategies coupled with an ethical and moral conduct fuelled by a constant “dialogue with himself”.

I think that reflecting on our therapeutic choices in the light of the spirit and philosophy embodied by Marcus Aurelius could constitute the “Mission” of our Congress.

One of the missions of the organizers is to make sure that your stay in Rome will be a memorable experience of warmth and friendship.

Arrivederci a Roma,

A handwritten signature in dark ink, appearing to read 'Antonio Longo'.

Main Topics

What's new in the sequential treatment of advanced rectal cancer

What's new in the treatment of T1 – T2 rectal cancer

Multiorgan resection in metastatic rectal cancer

Latest techniques in colorectal surgery

Pre- and Post-operative clinical and instrumental assessment of functional ano-rectal disorders

Pelvic organs prolapse: diagnosis and treatment

Hemorrhoids treatment: is it all grist to the mill?

Cost reduction in coloproctology

Panel discussion:

Radiologists – Coloproctologists

Endoscopists – Coloproctologists

Urogynecologists – Coloproctologists

Gastroenterologists – Coloproctologists

Advances in the use of new energies and devices in coloproctology

New fields of research for colorectal surgery

Fecal incontinence with intact sphincters

LIVE SURGERY: comparing techniques and new approaches
