• **D**ear Colleagues and Friends,
It is really a great pleasure to invite all of You once again to participate in the Course on Pediatric Urology “How we do it and How we did it”. The Course, at the 11th annual edition, maintains the practical characterization with live surgical demonstrations, video-presentations of surgical techniques and wide interactive discussion between Experts and Participants. In the 2016 edition, we will have the chance to observe and discuss videos on old urological reconstructive techniques, that someone probably has never seen but that can be still considered corner-stones on Pediatric Urology (gastro-cystoplasty, bowel reservoirs, ancient hypospadias repairs, bladder neck reconstruction, ...). It will be a special session, to better understand the evolving steps in Pediatric Urology. Do not miss this Course! As the number of participants is limited to 60 people to better enjoy interactive discussion, please complete your registration on time.

See you soon in Rome, the Eternal City with the special atmosphere of in the Jubileum year!

PAYMENT METHODS:

Registration for the Congress can be made online by using the registration service available on this website:
